Abstract. J on the left side of the equation is the volume of a control element. Because the control element right now is irregular, its volume should be calculated as $J = x_{n+1} - x_n$. The first term on the right hand side of the equation is net heat flux along the x direction, and the term inside $[\]$ is the heat flux along the x direction.

SIMPLE algorithm. SIMPLE is an acronym for Semi-Implicit Method for Pressure Linked Equations. The SIMPLE algorithm was developed by Prof. Brian Spalding and his student Suhas Patankar at Imperial College, London in the early 1970s. Since then it has been extensively used by many researchers to solve different kinds of fluid flow and heat transfer problems.
